Cleaning Machines™

Value Added Support

Surveying, Demonstrating & Recommending

Ensuring you and your client get the right equipment for the right application - anywhere in the UK and Ireland.

Delivering

Our fleet of vehicles deliver nationally - next day if necessary.

Supporting & Training

Whether it's on site or in our training centres in Northampton and Dublin.

Servicing

Maintenance contracts to ensure you get the best performance and productivity. Over 30 engineers keeping your machines going.

Dry Tub Vacuum Cleaners

Features & Benefits

A range of tub, upright & backpack dry vacuum cleaners providing top quality results, meeting industry recognised standards for air quality. A range that offers a selection of options for bag capacity, working width, single or twin motor, manual or electronic brush adjustment.

Air quality

High quality filtration and disposable dust bags make for superior air quality.

Efficiency

Superior Swiss engineering ensures exceptional airflow and dust removal.

Energy rating

A unique combination of patented motor technology, superior airflow and low energy consumption makes TASKI vacuums a great choice.

Ease of Use

Cable tidy and replacement cables reduce downtime and total cost of ownership.

Performance

Super efficient patented motor technology for best in class airflow.

Upright Vacuum Cleaners

Features & Benefits

A comprehensive range of single & twin motor upright vacuums.

Performance

Diversey's most comprehensive range of upright vacuums to date.

Ensign Evo Range the culmination of over 40 years of design excellence.

Ensign Sensor Range with automatic height adjustment, the intelligent choice.

Ensign 360/460 twin motor still the one to beat!

Ease of use

Hi visibility cables and replaceable kettle style plug cables on Ensign Evo and Sensor Ranges reduce maintenance costs. Intuitive and ergonomic controls make the Ensign Range a joy to use.

Efficiency & longevity

Robust and efficient design quality ensures machines give best total cost of ownership.

Power & efficiency

The powerful vacuum motor, with protection from the bypass airflow valve, provides highly efficient performance. The flat-to-the-floor profile allows cleaning under furniture whilst the easy-change mains cable provides a large cleaning radius.

Ease of servicing

Through modular design, the majority of servicing can be completed without the use of tools. Convenient brush and filter replacement and easy change of filter bags ensure maximum efficiency with minimum downtime.

Improved air quality

Ensign stealth utilises high performance S-Class filtration including a three layer filter bag and double size electrostatic exhaust filter. This results in significantly improved air quality during and after vacuum operation. Filtration can be further enhanced with the ease of the optional HEPA filtration kit.

Carpet Cleaners

Features & Benefits

A range of machines for use during daily carpet maintenance, periodic cleaning & for deep cleaning; when used in conjunction with the Woolsafe approved Tapi or Enhance range of odour neutralising chemical solutions.

The simple system for perfect carpets

An easy way to keep carpets looking younger for longer, Diversey carpet care range provides all of the methods, machines, accessories & products you need to solve all of your carpet care problems.

Innovative dry foam system

Utilised within the TASKI swift 35, this system results in minimum down time. It produces foam with 2% - 10% humidity, as a result of low humidity revitalised areas can be opened to traffic shortly after periodic cleaning.

Excellent deep cleaning results

Deep cleaning through spray extraction with the aquamat range, is the ultimate way to thoroughly clean your carpets. It increases the lifetime of your carpets by removing engrained dirt whilst maintaining the high appearance levels of your carpet.

Encapsulation method

The Pro Carpet range incorporates not only the standard extraction method but also a unique encapsulation method which has all the benefits of the dry foam method.

Used accordingly to the manufacturers instructions, woolsafe approved products will not cause damage to the fibres or colours & will not promote rapid resoiling.

O.N.T. Chemically neutralises unpleasant odours and simultaneously leaves behind a pleasant fresh fragrance.

Single Disc Machines

Features & Benefits

A proven range of single disc machines, providing the benefit of cost efficiency, productivity & high cleaning performance. The use of high tech materials create robust, shock absorbing machines with extended lifetimes & low costs.

Ergonomic Design

- Anatomically formed grip
- Adjustable handle
- Low vibration level
- Low noise level
- Soft start motor characteristics

Simplicity

- Easy to operate
- Easy to train
- Easy to store and transport
- Easy to attach accessories

Safety

- Hand protection
- Double safety lock
- Double insulation provides high electrical safety

Versatility

- Adaptable to many different cleaning methods: e.g. shampooing, stripping, sealing & burnishing; with a full range of accessories to suit each task.

Wet Vacuums

Features & Benefits

A range of wet vacuum cleaners, with a capacity up to 44lt, providing excellent suction performance, increased productivity and ergonomic operation.

Performance

High quality and well-designed components ensure good airflow leading to superb water pick up.

Versatility

Tilt and lift trolley option and wander hose and floor tool ensures even large areas can be quickly and efficiently vacuumed.

Ease of use

Ergonomic controls and tilt and lift options promote good ergonomics.

Durability

High quality components to ensure longevity and robustness.

8505420	Fixomat for vacumat 44T

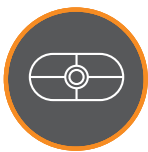

Scrubber Driers

Features & Benefits

The TASKI scrubber drier range provides unbeatable cleaning performance across a wide number of applications, small & large. From our smallest ever scrubber drier, the innovative TASKI swingo 150, to the 'ride on' TASKI swingo 4000 and 5000, the full range is designed to be simple to use, providing you with increased productivity, excellent ergonomics, high maneuverability and easy maintenance.

Yellow maintenance points

Promotes a reduction of preventable call outs. Helps keep machines in good working order. Saves you money.

Defra WTL

UK Government endorsement of TASKI's superior water efficiency. Potential savings through TAX relief.

Aquastop

Makes filling scrubber driers really simple and saves unproductive time. Stops automatically.

IntelliFlow

Automatically adjust water/solution to the speed of the machine. Standard foit on all Power swingo scrubber driers.

IntelliTrail

The most comprehensive telemetry available. See 24/7 when your fleet is used, how long and a whole wider list of features.

Toolstrap

Useful attachments to turn your scrubber drier into a versatile work station. Add mops, caution signs and other useful tools.

Patented squeegees

TASKI swingo scrubber driers are fitted with best in class water pick ensures floors are left clean and safely.

Extra Fast Charge

Smaller, quick charge batteries.

IntelliDose

Automatically linked to IntelliFlow, IntelliDose ensures perfect amount of solution and no chemical wastage.

BMS

(Battery Management System) for gel batteries. Extends battery life and reduces energy consumption. On board chargers.

Range Enhancements

What is BMS?

'Battery Management System' has a battery charger integrated into the machine, which allows charging of the batteries simply by plugging the 2.5m long cord into the mains. In addition BMS prevents deep discharging of the battery and monitors the charging process.

- Simple – correct choice of charger is ensured
- Location independent – just plug in / plug out
- Increased lifetime of batteries (cost reduction)

TASKI IntelliPower introduces the power of Lithium-Ion batteries to TASKI Scrubber driers.

The next generation of batteries allow:

- peace of mind operation and longer range & availability of the machines
- increased lifespan will make a replacement unnecessary
- maintenance free
- Cannot be harmed by incorrect charging

It is nearly impossible to abuse or misuse the battery and it will last up to 6 years.*

*based on the calculation of 2500 cycles.

Efficiency

Range Enhancements

Example: A machine with a 50 litre tank and IntelliFlow equals a conventional machine with a 65-75 litre tank

What's the benefit of IntelliFlow?

(Cleaning solution dosing)

With the patented IntelliFlow system, exactly the right amount of cleaning solution is dosed onto the floor, depending on how fast the machine is going. When you go round corners, you slow down and therefore less solution is dosed.

This leads to 30-50% reduced water consumption and therefore a reduction of time consuming tank filling stops. In addition, IntelliFlow prevents the creation of puddles in curves and turns.

Benefits:

- Higher efficiency and labour cost savings
- Virtually dry floor (no manual mopping of puddles)
- Sustainable solution
- Available on all powered versions of TASKI swingo scrubber driers

TASKI IntelliTrail 2.0 puts you in control

Full Site Transparency

IntelliTrail's unique technologies allow you to track your machine operations real-time through an online support platform. Even without machine power or within buildings, IntelliTrail stores and delivers reliable data and communicates feedback about your TASKI fleet operations and locations to individually assigned users for action and follow-up. All reports are available in HTML, Excel and PDF formats.

TASKI® ULTIMAXX

ULTIMATE FLEXIBILITY, MAXIMUM PRODUCTIVITY

The all new TASKI ULTIMAXX range offers a wide range of possibilities to meet the highest expectations.

This new level of modularity allows you to customize the machine for the cleaning process with flexible selection of working width and brush decks.

Brush decks: Single disc | Dual disc | Dual disc TWISTER PLUS | Dual cylindrical with hopper | Orbital rectangular

SINGLE DISC

The new single disc deck has direct gear construction, significantly improving length of use combined with perfect water distribution for reliably high cleaning standards.

DUAL CYLINDER WITH HOPPER

The new ultra-robust dual cylinder roller brush deck sweeps and cleans in a single pass, reducing the need for pre-sweeping on.

ORBITAL

Deep cleaning and top stripping made easy with robustly designed orbital head technology that minimises vibration. Combined with TWISTER diamond pads, the orbital deck becomes a chemical-free, multipurpose deck.

DUAL DISC

Dual disc technology allows high productivity in combination with excellent cleaning results. The offset dual disc brush decks allows simple, water-efficient close-to-wall cleaning. Also available as TWISTER version.

TASKI Ultim maxx 1900

The all new TASKI ULTIMAXX 1900 walk-behind economy scrubber range offers excellent agility in its class. Combined with the high quality components used the new TASKI ULTIMAXX achieving new levels of robustness. This leads to excellent uptime and a longer life span of the machine, creating the best total cost of ownership.

Cleaning Machines™

Tools

TASKI ToolStrap

The TASKI ToolStrap range is a number of accessory holders for fitting to TASKI swingo pedestrian scrubber driers. They allow tools such as TASKI Versa, TASKI Lamello and the TASKI range of microfibre to be conveniently affixed to TASKI swingo scrubber driers. In addition, traditional mops, sweepers and caution signs can also be used with TASKI ToolStrap.

TASKI®

The **ULTIMATE**
Cleaning Machines™

TASKI Ballimat Sweeper

The new TASKI balimats 2300, 3300 and 6500 deliver unbeaten cleaning performance and perfectly fit into the world of TASKI machines. The patented TRS system combines with integrated vacuum suction allow use of machine inside but also outside the house and on many different surfaces.

Modern and robust TASKI sweepers save your valuable time and make your life easier!

Simple, intuitive design

Easy, self explaining use of machine reduces the need for operator training and enhances time for cleaning.

Versatile use

Balimat sweepers are perfectly designed for indoor and outdoor use and on different surfaces like carpet or hard floors.

Ergonomic use

Height adjustable, ergonomically designed seat and handle for safe and comfortable use. Handle can be folded for easy storage.

Excellent performance

Modern and robust TASKI sweepers come with wide working width and an extra large hopper – to save valuable time and make your life easier!

Tandem roller system (TRS)

The patented TRS in combination with integrated vacuum suction delivers perfect cleaning results. It is a real differentiator and delivers perfect cleaning results on various floor types. The 2 counter-rotating roller brushes transport the debris from one roller to the other and transport it upwards

TASKI Ballimat Sweeper

TASKI balimat 45

Manual sweeper with 800mm working width, for use on all hard - floors & out.

Code	Recommended Standard Spec
8004690	TASKI balimat 45

TASKI Balimat 2300 RTU

This compact battery sweeper brings a perfect sweeping result on various floor types due to patented Twin roller system (TRS). It is flexible use both indoors and out, with increased productivity due to wide working width. The compact size and agile handling allows perfect use in narrow areas.

Steam Cleaners

Features & Benefits

Complimentary

Steamers are the perfect complement to TASKI floor & carpet cleaners. In addition steamers can be used for walls and other vertical surfaces.

Versatility

Suitable for cleaning such diverse objects and materials as grouting, greasy kitchen equipment or even carpets and fabrics. Our full range use continuous fill boilers to eliminate waiting for water to heat up.

Deep cleaning

Perfect for removing heavy greasy soilage from porous surfaces. Diversey Steamers can be specified with 4 or 8 bar pressure, with or without both detergent and vacuum features to suit budgets and applications.

Powerful

4 & 8 bar options make light work of difficult deep cleaning tasks.

7523487	Steam SV4 with Kit

SDV8 Steam, Detergent & Vacuum continuous 8 Bar, Complete with full steam, detergent & vacuum accessory kit.

Top of the range machine with all the combined features. Complete with mini trolley. Ideal for the mobile specialist or for sites looking for just one machine for all tasks.

Code	Recommended Standard Spec
7523488	Steam SDV4 with Kit

What is Twister?

Twister is a revolutionary method for everyday machine cleaning of any type of floor. With billions of microscopic diamonds, the Twister pads clean and polish your floor at the same time, without chemicals.

It's the easy, cost efficient and environmentally friendly approach to professional cleaning, producing astonishing results every time.

How does Twister work?

Diamond is the hardest material on earth and remains effective throughout the lifespan of the pad. These hard diamonds when embedded into a flexible pad have the ability to micro-polish any floor type, making the floor more resistant to dirt!

The increased floor quality achieved with Twister pads results in extended lifespan of both floor and pad. Lasting 3 times longer than a standard floor pad!

The difference between the alternative colors is the size or mix of the diamonds. Depending on the diamond mix impregnated in the pad, various applications can be performed.

DEEP CLEANING – UPGRADE – DAILY CLEANING/
POLISHING

“Since we introduced the Twister method, I’ve been completely confident that the floors are clean, whatever the weather, weekday, or season”

Lennart Johansson
- ICA Maxi’s Manager

“We knew straight away that these were exactly what we’d been looking for, that Twister was the cleaning method of the future”

Savvas Christoforidis
Managing Director of Exiso

Why Twister?

Adopting the Twister approach to professional cleaning brings even better results, satisfied customers, increased cost-efficiency, lower environmental impact and safer environments. Above all, we are talking about being able to accomplish all of this on a daily basis, without any extra work – and at a lower cost.

Better Results

- Cleaning and polishing at the same time
- Produces long-lasting, high-quality results
- Periodic maintenance may have just become a thing of the past

Cost Savings

- Up to 66% savings on consumable spend
- Reduced need for periodic maintenance
- Reduced need for machine maintenance
- Increased life cycle of floors

Eco Savings

- 100% chemical savings
- 66% floor pad use savings
- 98% consumable weight reduction
- Reduced transportation and handling

Safety

- Cleaner floors = safer floors
- Safer procedures and work conditions
- Chemical free environments

Satisfied Customers

- Increased customer experience
- Clean and shiny floors 365 days per year
- Leading companies have already discovered the benefits!

1. Mount the Twister pad on any type of ordinary cleaning machine.

2. Pour ordinary tap water (not chemicals) into the machine.

3. And that's it. You're now ready to clean.

TASKI Service Station 300

Features & Benefits

The TASKI Service Station 300 offers high-speed filling solution with 300 ltr tank to fill scrubber driers with bigger tank sizes in a very short time. Flow-rate of 150-160 ltr/min.

For example only 75 seconds to fill a large 200 ltr swingo 4000 tank vs 18 minutes at standard water flow rates. Large productivity savings can be made and ROI can be as little as 12 months.

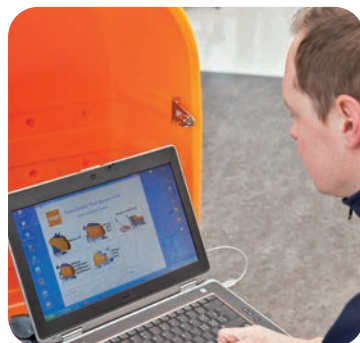

TASKI has over 60 years' experience in manufacturing quality Swiss Floor Cleaning Machines.

The TASKI Factory guarantee covers defects in manufacturing and workmanship. TASKI Service Packages are designed to ensure optimum performance during and after the guarantee period of your TASKI machines. To ensure optimal operational efficiency, we promote to our customer to subscribe to the TASKI IntelliGold service solution for their scrubber dryer fleet which offer efficient service on time where it needs it. The IntelliGold service contract contain the same advantage than the gold contract but the criteria's of maintenance are better forecasted thanks to the TASKI Intellitrail advanced gps which monitor operating hours, critical battery status and much more. Our preventative maintenance programs are designed by our expert technicians to keep your machines functioning as new throughout its lifespan. TASKI Technicians undergo annual training and updates on all machines to ensure an on the job know-how that speeds up execution and ensures quality of work completed during service visits. They are equipped with all the needed TASKI gear and the use of laptop and smartphone technologies allow them to work as fully mobile units on site at service calls.

Our drive behind Service Contracts is lowest total cost of ownership over the lifespan of your TASKI machine.

We achieve this through:

- Cost savings & more predictable costs
- Reduced breakdowns & **higher efficiency**
- Extended machine lifetime
- Consistent and **always perfect cleaning and drying results**
- Little own maintenance

TASKI Ultimaxx Service Plans

The Ultimate Service for an Ultimate Cleaning Machine.

With its new digital innovations, the Ultimaxx range allows deeper integration and new ways of scheduling service, reducing or preventing downtime.

Without you contacting us, we oftentimes know when the machine requires service, and we will service the machine proactively with every service plan.

TASKI IntelliCheck

Predictive Maintenance based on overall hours, critical component hours, error messages. One annual visit guaranteed.

Labour for predictive visits included.

TASKI Full Service

Full predictive and breakdown service. One annual rate for all service interventions (excl. misuse and abuse).

Incl. Batteries

TASKI Pledge

TASKI Uptime guarantee. TASKI guarantees an uptime of the machine of 97%.

Utilizing IntelliTrail 2.0 monitoring, we know when the machine needs service or is about to break.
